SKILLS

Next.js | React.js | Python | Kubernetes | Docker | PostgreSQL | MySQL | MongoDB | GraphQL
Typescript | Javascript | LoopBack | Bash | scripting | Express.js | Node.js | AWS | Azure | GCP

EDUCATION

Master of Engineering

MES College of Engineering

Bachelor of Engineering

University of Calicut

LANGUAGES

English

PROFILE

With over 7 years in the field, I'm a seasoned T-shaped Developer specializing in Backend and Frontend Web Development. My expertise lies in JavaScript, Node.js, React.js, and Next.js, with additional proficiency in Python and PHP. Known for optimizing performance, implementing robust security measures, and untangling complex bugs, I bring a strong track record of enhancing system functionality.

WORK EXPERIENCE

Software Engineer

Barnebys   SEP 2022-Present

- Developed backend and front-end systems.
- Implemented containerization for improved scalability.
- Enhanced overall infrastructure for optimal performance.
- Maintained and troubleshooted scraping infrastructure.
- Contributed to improving CI/CD processes.
- Ensure adherence to OWASP security standards.

Senior Software Engineer

Ernst & Young   FEB 2022-JUL 2022

- Accessibility (a11y) lead, ensuring the project adhered to the highest standards for inclusivity and user-friendliness.
- Fullstack development of a tax management app
- Development team lead for Indian region
- Ensure adherence to OWASP security standards.

Lead Engineer

Emvigo Technologies   DEC 2020-JAN 2022

- Designed and implemented full stack web applications
- Team management
- Architectural analysis of projects
- Enhancing the efficiency of infrastructure for a data-driven application.
- AWS Cloud Development

Software Engineer

QBurst Technologies   APR 2018-DEC 2020

- Designed and implemented full stack web applications
- Team management
- Architectural analysis of projects
- Enhancing the efficiency of infrastructure for a data-driven application.
- AWS Cloud Development

Software Engineer

Intellect Technomedia   MAY 2017-APR 2018

- Designed and implemented a SOA microservice with a JSON HTTP REST API
- Implemented a TOTP (Time-Based One-Time Password)-based system including database schema design, HTTP request handling, and pages presented to users
